ANILKUMAR YARA

QA AUTOMATION ENGINEER

Hyderabad, India | +91-7729936300 | anilkumaryara564@gmail.com
LinkedIn: linkedin.com/in/anilkumar-yara-1588571a0 | GitHub: github.com/anil-automation

Professional Summary

QA professional with 4.4 years of overall experience spanning manual testing and automation. Experienced in functional, regression, smoke, sanity, integration, and end-to-end testing, defect management, API validation, and SQL-based backend checks. Automation skills include Selenium WebDriver with Core Java and Playwright with TypeScript/JavaScript, including POM, reusable utilities, fixtures, hooks, assertions, locator strategies, and HTML reporting. Familiar with Agile delivery and AI-assisted test design and debugging.

Technical Skills

Programming Languages: Core Java, JavaScript, TypeScript, SQL

Automation Tools: Selenium WebDriver, Playwright

API Testing: Postman, Playwright API validation

Automation Concepts: Page Object Model (POM), reusable utilities, fixtures, hooks, assertions, locator strategies

Database: SQL queries, backend data validation

Version Control: Git, GitHub

Test Management & Tools: Jira, MantisBT, VS Code

Testing: Manual, Functional, Regression, Smoke, Sanity, System, Integration, Exploratory, End-to-End

AI-Assisted Testing: ChatGPT and Claude AI for test ideas, scenario expansion, and debugging support

Professional Experience

Test Engineer – IPowerFour Technologies Pvt Ltd | Hyderabad

Jul 2022 – Present

Project: Real-Time Project Management System

- Analyzed requirements and translated business workflows into test scenarios, test cases, and test data.
- Executed functional, regression, smoke, sanity, integration, system, and end-to-end testing.
- Developed automation scripts and project-based checks using Selenium WebDriver with Core Java and Playwright with TypeScript/JavaScript, aligned to actual project scope.
- Applied Page Object Model (POM) principles and reusable methods to organize automation code and improve maintainability.
- Used Playwright fixtures, hooks, assertions, locator strategies, and built-in waiting behavior to support reliable UI checks.
- Performed API checks using Postman and Playwright where applicable; validated expected responses and behavior.
- Validated backend data and data consistency using SQL queries.
- Logged, tracked, and retested defects using Jira/MantisBT, working with developers to verify fixes.
- Collaborated with developers and QA stakeholders during Agile activities and supported release validation.
- Reviewed automation results and HTML reports to investigate failures and communicate test outcomes.
- Used Git/GitHub for version control and AI tools to assist with test design and automation debugging.
